

Set-up
is as
easy as...

PIPPIN™ @WORLD®

ADVANCED TECHNOLOGY BY APPLE COMPUTER

A

Open your boxes...

Become familiar with the components of your @WORLD.

1

Setup Map

2

Power cord

3

Phone cable and AC adapter

@World User's Guide and Manuals

B

Set it up...

Connect your VCR and modem to your @WORLD.

1

Connect the @WORLD to your Stereo TV with the supplied AV cables.

An alternative configuration like the one shown above may be used with the supplied AC adapter.

2

Connect the @WORLD modem cable to the phone jack and the phone line splitter with the supplied AC adapter.

3

Plug in the modem and your phone to the phone line splitter, insert the splitter into a phone jack.

C

Plug it in...

Now you're ready to explore!

1

Plug in the @WORLD console to your @WORLD set.

Align the groove in the top of the guide to each port on the @WORLD.

2

Plug the power cord into your @WORLD and into a grounded electrical outlet.

Power Base

CD tray

Turn on your TV, press the power button to turn on the @WORLD, then press the CD tray button to open the tray.

*Use only the TV, VCR and other equipment listed in the User's Manual or contact your local Apple II® Retailer.

If you need further assistance, refer to the User's Manual or contact your local Apple II® Retailer.

3

Insert the @World

Insert the @World into the @WORLD set.

Push the CD tray gently to close. The @World Base CD will start in a moment. This is your ready-to-go and connect with your @World.
